LTP MOULDEX

Grout Cleaner

Helps the removal of mould stains caused by mould spores, fungus & algae from grouting including the surface of silicone seals and other damp places.

Formulated to cling to surfaces and remove mould stains caused by mould spores, fungus, algae and moss from grouting, the surface of silicone seals and other damp places. Ideal for bathrooms and kitchens. Suitable for inside and outside use. Bleaching action helps restore white grouting to its original colour.

Directions for use

For application and cleaning tools see LTP website.

SHAKE WELL BEFORE USE. Surfaces to be treated should be completely dry before application. Always test in an inconspicuous area before general use. Hold upright and spray 5-10 cm from surface. Leave for 45 minutes. Apply a little water and agitate with a stiff brush to release dirt and grime. Rinse thoroughly using a sponge and water.

Stubborn stains and most silicones or elastic grouting will require a longer treatment, in which case apply and leave on surfaces overnight. In case of contact with metals, fabrics and painted surfaces rinse with water immediately.

Do not use with acid based residual grout removers or other acid based cleaners.

Can be used on natural stone and coloured grouting, however always test on an inconspicuous area before general application.

Coverage

5-15 m2 depending on size of tile.

Notes

***Important*: FOOD ESTABLISHMENTS -** Equipment and surfaces subjected to direct food contact must be thoroughly rinsed with potable water after cleaning with this product. Avoid contamination of food during use. Do not store in food processing or food storage area.
